

January 17, 2017

Dear Neighbors,

As mentioned in our December 2016 correspondence, Key School's leadership is committed to providing all residents of Annapolis Roads with information about the development plans for Fusco Athletic Park. With the Site Development Plan and Grading Permit approved, the School is now moving forward with development and plans to complete installation of the well in the first quarter of 2017.

As email will not reach all residents and recurring mail is not a viable means of sharing information in a timely and environmentally sensitive way, Key School has decided to post updates, as they are available, on its website at [www.keyschool.org/FuscoAthleticPark](http://www.keyschool.org/FuscoAthleticPark) under a segment titled "Development Updates." When updates are posted, we will email the ARPOA leadership directly. Please rely on this website for the latest news about our work at Fusco Athletic Park. As this page has been active since our purchase of the property in August 2013, it chronicles much of the work undertaken in the past several years including media coverage, correspondence with the community, and the evolution of the Site Development Plan.

As stated over the years, Key School is sincerely committed to the stewardship of our property, both during development and once Fusco Athletic Park is complete. We also look forward to building positive relationships with the members of the community over time.

If you have questions about Fusco Athletic Park, you may contact Key's Head of School, Matthew Nespole, [mnespole@keyschool.org](mailto:mnespole@keyschool.org); 410-263-9231.

Regards,

Joseph A. Janney III  
Board of Trustees President

Matthew Nespole  
Head of School
